

8 February 1960

DISTINCTION BETWEEN GR's AND GP'sGR and GR L (formerly G and GR) -- conform to all of the following criteria

1. Is essentially an original contribution involving new research, new analysis, or new evaluation or orientation.
2. Is a complete, well rounded, thorough, positive intelligence statement.
3. Is disseminated in final form as a Geography Division publication.

GP and GP L (formerly G/E and G/I) -- conform to any one of the following criteria

1. Is essentially a summary or commentary based on readily available data (e.g., some GG/X memos).
2. Is directed toward a question or problem that does not require a complete, well-rounded study (e.g., boundary file).
3. Is primarily a service job involving collection or collation of geographic data, or geographic technical aid (e.g., compilation of population figures, street names, distance or area measurement; simple application of formulae).
4. Is disseminated in final form as, or in, a publication other than that of the Geography Division (e.g., city plan maps; contributions to NIE, NIS, publications of ERA).
